DETAILED ACTION

Note that original claims 1-19 have been cancelled and new claims 20-35 have been added.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 20-35 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-24, 1-20 and 1-23 of U.S. Patent No. 6,534,679, 6,320,077 and 6,229,046. Although the conflicting claims are not identical, they are not patentably distinct from each other because the differences between the claimed invention and the claims of the references are the claims of the references do not disclose the last three steps in claim 20, the last three steps in claim 27 and the last three steps in claim 31.

However, the references do disclose these steps of the process, such as in Figures 3, 9 and 7.

Therefore, it would have been obvious to one of ordinary skill in the art to select the steps from Figures 3, 9 and 7 in the references to include in the claims of the

Art Unit: 1711

references since they have been shown to be effective in a similar system and thus would have been expected to provide adequate results. There is no showing of unexpected results derived from said selections.
